Our host project partners

> Integrate, Preston

Integrate provides support and vocational training for **adults with learning disabilities**. Their services are varied, and include residential homes, a gardening service, and a furniture restoration workshop. Volunteers are assigned to particular projects, assisting and enabling clients with learning disabilities to develop life skills and take responsibility for tasks such as budgeting, group skills and using public transport. Other domestic day-to-day tasks may include cooking and cleaning, and there will be periodic shopping or cultural outings.

This placement is most appropriate for volunteers who can befriend and support the service users in individual and group settings, and help maintain a positive and supportive environment.
